Profile

Third-year Software Engineering undergraduate with demonstrated expertise in full-stack development using Spring Boot, React, Laravel, and PostgreSQL. Experienced in mobile development with React Native and Flutter. Passionate about clean software architecture, scalable system design, and collaborative agile workflows. Actively seeking Software Engineering Internship opportunities to apply technical skills and contribute to building efficient, user-focused applications.

Education

University of Colombo School of Computing (UCSC) 2023 – Present
- B.Sc. in Computer Science

St. Aloysius' College, Galle 2006 – 2021
- G.C.E. Advanced Level Examination – Physical Science Stream
- Z-Score: 1.7732 | Combined Mathematics: A, Physics: A, Chemistry: B

Professional Experience

Research Student | Rasaswadaya Project View Repository
AI-Driven Entertainment Platform for Sri Lankan Arts & Culture
- Architected and built scalable backend APIs using Next.js, Nest.js, and PostgreSQL, serving 500+ concurrent users
- Engineered AI/ML modules for social graph mining, achieving 85% accuracy in personalized content recommendations
- Delivered core platform features including user/artist management, content uploads, event handling, live streaming capabilities, and real-time analytics dashboards
- Collaborated with cross-functional team of 5 developers to ensure on-time delivery of project milestones under supervision of Dr. Shiromi Arunathilake
- **Technologies:** Next.js, Nest.js, PostgreSQL, Python

Development Projects

GarageMaster – Vehicle Service Center Management System View Repository
Real-World Client Project | April 2025 – August 2025
- Deployed a production-ready vehicle service management platform on cPanel hosting
- Built a digitalized booking system with an integrated customer service history portal
- Containerized the MySQL database using Docker for reliable and consistent deployments
- Implemented a CI/CD pipeline to automate application deployment to production
- **Technologies:** React (TypeScript), PHP, Laravel, MySQL (Docker), CI/CD, cPanel

PureLeaf – Tea Factory Management System View Repository
Full-Stack Web & Mobile Application | April 2025 – October 2025
- Constructed full-stack system managing 15+ suppliers, 200+ inventory items, and daily route tracking for tea collection operations
- Launched cross-platform mobile application with offline functionality, enabling field operations in areas with limited connectivity
- Established RESTful API architecture processing 1,000+ daily transactions with real-time Firebase synchronization
- Refined inventory management, reducing stock discrepancies by 35% through digital tracking

- **Technologies:** React, Spring Boot, PostgreSQL, Firebase, React Native

LaunchPad – Internship Management System View Repository

- Initiated a platform managing 100+ internship applications with mechanized approval workflows and progress tracking
- Secured system with role-based access control (RBAC) supporting 5 user roles: students, PDC, company, lecturer, and administrators
- Crafted normalized database schema, reducing query response time by 50% through indexing strategies
- **Technologies:** PHP, HTML, CSS, PostgreSQL

DineMate – Restaurant Management System View Repository

May 2024 – April 2025

- Produced a responsive restaurant platform managing 50+ menu items with real-time order tracking for 10+ concurrent tables
- Accelerated order processing time by 25% through enhanced RESTful API endpoints and database indexing
- Incorporated customer-facing interface with live order status updates, improving customer satisfaction scores by 20%
- **Technologies:** React, Node.js, Express.js, MongoDB

SnapTalk – Mobile Chat Application View Repository

Mobile Development Project | July 2025 – August 2025

- Programmed cross-platform messaging app supporting real-time communication for 2+ paired devices via QR-based authentication
- Designed a local data persistence layer using SQLite, storing 500+ messages with improved query performance
- Executed push notification system and error handling mechanisms, ensuring a 95% message delivery rate
- **Technologies:** Flutter, Dart, SQLite, Firebase Cloud Messaging

Technical Skills

Programming Languages: Java, PHP, JavaScript, TypeScript, C, C++, Dart

Frontend Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend Development: Spring Boot, Laravel, Node.js, Express.js, Nest.js, RESTful APIs

Mobile Development: React Native, Flutter

Database Systems: PostgreSQL, MySQL, MongoDB, SQLite

DevOps & Tools: Git, GitHub, Docker, Firebase, Postman, Linux, VS Code, IntelliJ IDEA

Project Management: Jira, Slack, Figma, Agile/Scrum methodologies

CMS & Deployment: WordPress, cPanel, Vercel

Extracurricular Activities

University of Colombo Hockey Team 2023 – Present

- Active player representing university in 3+ inter-university tournaments, competing against 10+ universities
- **Achievements:** Merit Award (2024), Colour Award (2025), SLUG 2025 Champions, Mora 9's Champions, Pera 6's Runner-up, Vice Chancellor Trophy 2025 Champions

Rotaract Club of UCSC 2023 – Present

- **Editor, Executive Committee (2025–Present):** Lead editorial team of 3 members, producing 10+ publications and managing social media content reaching 500+ club members monthly
- **Member, Public Relations Avenue (2024–2025):** Orchestrated 5+ community outreach events, increasing club visibility by 40% through strategic communications
- **Member, Club Service Avenue (2023–2024):** Participated in 8+ service projects benefiting 200+ community members
